Alltrucks Fleet – The multi-brand premium service offer for fleets is being launched and will increase uptime, safety and cost control for commercial vehicle fleets in Europe

With Alltrucks Fleet, a comprehensive range of services for the maintenance and repair of commercial vehicles in Europe is starting today. Regardless of brand and manufacturer, trucks and trailers are maintained and repaired at OE service level and to fair conditions throughout the Alltrucks service network.

Munich. The effort for maintaining fleets is immense, especially if the vehicles are older or of mixed brands and when they are operating internationally. If, for example, an unexpected repair of a vehicle is required abroad, first a qualified workshop must be found for this vehicle. In such an emergency the amount of the repair costs is often a controversial issue. The solution for this is Alltrucks Fleet. Alltrucks Fleet provides fleet companies Europe-wide reliable service conditions for all fleets, regardless of the brand and manufacturer of the vehicles. With Alltrucks Fleet Fleet-Managers can rely on a fair treatment, established processes with the highest quality standards and repairs according to manufacturer standards. The service network consists of around 700 workshops and covers 14 European countries: Germany, Austria, Switzerland, Poland, France, Spain, Portugal, Italy, Norway, Belgium, the Netherlands, Lithuania, Luxembourg and Romania.

Valuable time savings, highest quality standards and increased cost control

Alltrucks Fleet customers are given preferred treatment in terms of scheduling and waiting time in case of unexpected repairs in the complete Alltrucks Fleet service network. A simple repair approval process ensures a quick and uncomplicated start of the repair. In addition, uniform service procedures are guaranteed in every participating workshop, regardless of whether the repair occurs for instance in Warsaw or Lisbon. A Europe-wide 24-hour break-down service is also available. Therefore, the customers will gain valuable time. Not only do they reduce the waiting and downtimes of their vehicles, they also lower the effort required to find a qualified workshop along the entire route.

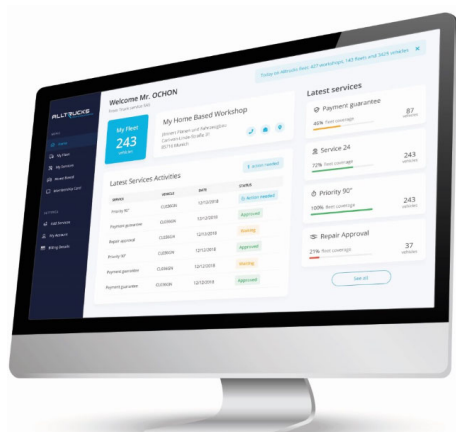

Alltrucks Fleet offers the highest multi-brand quality standards. All maintenance and repairs are carried out in accordance with manufacturer's standards and spare parts are used only in OEM quality. This minimizes unexpected breakdowns and extends the lifetime of the vehicles. Customers also benefit from fast and reliable processes. From locating the nearest Alltrucks Fleet workshop to repair – all Alltrucks Fleet Services are provided via an access to the Alltrucks Fleet platform, where they are clearly and transparently documented.

Alltrucks Fleet customers can trust on fair prices without unexpected surcharges. Unpleasant surprises with the workshop invoice belong to the past. Therefore, customers profit from a significant increase in planning and cost security. Before starting the repair, there is always a close consultation either with the customer himself or with his home-based workshop. This ensures that only necessary work is carried out and unnecessary additional costs are avoided.

Easy access via online platform

All Alltrucks Fleet services are centrally available and managed via an online platform. The participation for fleet companies is very easy. The registration is for free. After successful registration, only the vehicles need to be entered. In the event of maintenance or repair, the customer will easily identify the nearest Alltrucks Fleet workshop through the platform and will benefit from all the advantages of Alltrucks Fleet. More information is available at <https://www.fleet-alltrucks.com>.

“With Alltrucks Fleet we are proud to offer a real alternative to the service networks of the manufacturers. Alltrucks Fleet is the comprehensive solution for all commercial vehicle fleets for maintenance and repair within the largest independent European service network”, says Homer Smyrliadis, Managing Director of Alltrucks. “The services of Alltrucks Fleet create real added value for commercial vehicle fleets. They provide a highly efficient way for maintenance and repair of the entire fleet at reasonable costs without compromises in quality. In the following years, we will expand Alltrucks Fleet with further useful services in order to meet our customers’ expectations.”

ALLTRUCKS TRUCK & TRAILER SERVICE

Alltrucks GmbH & Co. KG was founded as a joint venture by the three leading automotive and commercial vehicle suppliers Bosch, Knorr-Bremse and ZF in 2013. Under the Alltrucks Truck & Trailer brand it offers commercial vehicle workshops a wide range of services in maintaining and repairing light to heavy commercial vehicles, trailers and semitrailers – across all brands. These services include multi-brand vehicle diagnostics, a technical hotline, customized training courses, technical information, a 24/7 service, marketing support and professional quality management. The system headquarters based in Munich is continuously expanding its portfolio, including new cooperation programs and fleet services – in the medium term throughout Europe.
